

INNOMEDICA IS A YOUNG NANOTECH COMPANY with more than 50 employees, multiple promising drugs in clinical and preclinical development as well as its own clean room production. InnoMedica's pipeline is based on an innovative liposomal delivery system, which notably includes applications in the fields of oncology and neurology. In view of entering the market in the near future, production capacities will be scaled up to larger volumes and further expanded. To implement this strategy, InnoMedica's qualified team is continuously growing.

For the research and production site in Marly near Fribourg we are looking for a

Production and Process Engineer Pharma

As part of the Production and Engineering team you will produce pharmaceutical products for ongoing clinical trials. In this context, you contribute significantly to the development of new GMP production processes with the aim of increasing production capacity. You will be responsible for ensuring and documenting the high-quality standards according to cGMP guidelines. In interdepartmental projects, you will be involved in complex matters regarding product scaling, product stability or process automation. Further, you will be in charge of the evaluation, purchasing and maintenance of production equipment.

As a prerequisite for this job, we expect a completed apprenticeship or a university degree in the field of pharmaceutical technology, chemistry or biochemistry, preferably with experience in a research laboratory or in a pharmaceutical environment. You have a methodical approach and work in a proactive manner. You show team spirit as well as entrepreneurial spirit and are excited to participate in the dynamics of an innovative start-up company in the pharmaceutical industry.

Interested candidates are kindly requested to send their application documents to Ms. Jacqueline Camenzind, who can also be contacted for additional information by phone (058 521 35 01) or e-mail (jacqueline.camenzind@innomedica.com).
