

INNOMEDICA IS A YOUNG NANOTECH COMPANY with more than 50 employees, multiple promising drugs in clinical and preclinical development as well as its own clean room production. InnoMedica's pipeline is based on an innovative liposomal delivery system, which notably includes applications in the fields of oncology and neurology. In view of entering the market in the near future, production capacities will be scaled up to larger volumes and further expanded. To implement this strategy, InnoMedica's qualified team is continuously growing.

To support our research and production site in Marly near Fribourg as well as our office team in Bern, we are looking for a

Business Application Engineer

You are responsible for the maintenance of internal IT applications (ERP, GMP and laboratory software) and ensure their further development as well as the training and support of the users. Moreover, you are responsible for data and information management, including access control and data security. You design concepts for the expansion and extension of existing IT systems, produce internal solutions and manage external procurement projects.

As a prerequisite for this exciting job, we expect a university degree, preferably in (business) informatics or another equivalent education with corresponding further training or work experience. Conceptual thinking is a strength of yours, you have a passion for software development as well as good communication skills in the environment of users and external partners. You are an entrepreneurial thinker and look forward to participate in the dynamics of an innovative startup company.

Interested candidates are kindly requested to send their application documents to Mr. Tobias Suter, who can also be contacted for additional information by phone (058 521 35 72) or email (tobias.suter@innomedica.com).
