

INNOMEDICA IS A YOUNG NANOTECH COMPANY with around 40 employees, several promising drugs in preclinical and clinical development and its own clean room production. The pipeline is based on a liposomal delivery system and includes, in particular, parenteral drug candidates applied in neurology (a new approach to treat Parkinson's disease) and oncology (chemotherapy).

For the research and production site in Marly near Fribourg, we are looking for a

Scientist Quality Control & Analytics

As part of the Quality Control & Analytics team, you will be responsible for quality control tasks in a GMP environment. You will test drugs in the laboratory for their use in clinical trials and work on the analytical development of our methods.

Your job profile includes:

- GMP analyses of clinical products for their release and stability studies
- Development and validation of analytical methods
- Release analyses of raw materials
- Troubleshooting for devices and methods
- Documentation of deviations and change requests
- Qualification, maintenance and calibration of laboratory equipment
- Interdepartmental project work

As prerequisites for this exciting job, we expect a university degree in (bio-)chemistry, pharmacy, or a related field. You bring a high level of quality awareness and an analytical mindset to the team and have substantial experience with HPLC-based analytical methods. Hands-on experience in a GMP environment is considered a plus. You work independently, show initiative and team spirit, and appreciate the dynamics of an innovative start-up company. Good communication skills and knowledge of English complete your profile.

Interested candidates are kindly requested to submit their application in PDF format to Ms. Noëlle Haas, who can also be contacted for additional information by phone (058 521 35 35) or email (hr@innomedica.com).
